Description:

Review The intellectual level of this project is exceptionally high and a very impressive work has been produced. The authors have come up with important and, occasionally, unexpected findings. This book has pushed back the boundaries of our understanding of

interethnic relations in the former Soviet Union. - Richard Sakwa, University of Kent, Canterbury

By its scope alone, this study is interesting. More than that, it is impressive for the sophistication and scholarly rigour with which it deals with the material. As attitudes are measured on several levels, and a complexity of possible causal pathways are explored, the book stays firmly focused. The findings are convincing, policy-relevant and sometimes surprising. The combination of psychological approaches to loyalty, prejudice and conflict with statistical surveys in this case has created a study that very nicely builds on existing social science work on the Russian diaspora. - Journal of Peace Research
