Description:

(Full Color Version)

Learning is a skill. Students who earn good grades are not necessarily smarter, they just have good learning skills. All schools teach course material but very few teach how to learn. How is a student supposed to develop learning skills, if nobody explains what they are?

This book explains how to be an effective student. It uses straightforward language and the techniques are easy to implement. The concepts are not difficult--the entire book is only 3/8 inches thick!

And it works. Most students see dramatic improvements immediately, and the benefits go beyond grades. Stress is reduced, self-image improves and confidence increases.

Good grades lead to opportunities, which lead to better income and a better life. School is supposed to prepare you for life -- it should not be your life. Grades=Money can turn you into a great student, and make it possible to learn in less time, so you have time to do other things.

Grades equal money. This book prepares you to earn both. Start now.
